3065LA 3060LA

With multiple protocols and flexible paper handling, the Compuprint 3060LA and 3065LA dot matrix printers are ideally suited for a wide range of printing applications, such as pharmaceuticals, healthcare, education, government, and requirements such as multipart forms, single sheets, labels and envelopes.

Value and Features

- OpenVMS and Tru64 Unix compatible
- High quality 24 pin-head
- 360 cps at 10cpi up to 432 cps max speed
- Single sheets and continuous form
- 5 copies capability
- Wide range of fonts and barcodes
- Zero tear-off and automatic paper parking

A leading-edge series for today and tomorrow

Compuprint 3065LA and 3060LA are 24 pin models support several protocols and emulations. The seven resident typefaces and eight resident barcodes fonts ensure fast, high-quality text and dependable bar code printing.

Fast, flexible, reliable

Versatile paper handling features allow for either rear or bottom paper feed, as well as push or pull tractor feed. These printers provide a straight paper path, multi-copy capability, high throughput, and automated paper detection to ensure trouble-free operation. In multi-user environments, users can choose either of two configurations, which are readily accessible through the control panel or application programs. To reduce the risk of accidental job interruption, the printer's control panel can be locked out under program control.

For a broad range of connectivity and printing requirements

These models support DEC ANSI, IBM Proprinter XL24e and Epson ESC/P2 and feature plug-and-play Windows 95/98/2000 capability.
